

1. Preparing the Tablet

Fully charge your *Tablet* and familiarize yourself with its features. Configure the tablet interface as desired.

2. Getting the PT900 Android APP

Get the PT900 APP from one of the following:

- **Google Play Store** (free download):
Set up a free account in **Google Play Store**. Search for the **TransPort PT900 APP** and install it on your tablet.
- **QR Code** or **BH Website** (free download):
Either Scan the QR Code below or go to
["https://www.bakerhughes.com/resources-center"](https://www.bakerhughes.com/resources-center) to download the PT900 APP from the website to your tablet.

- **SD card** included with your PT900:

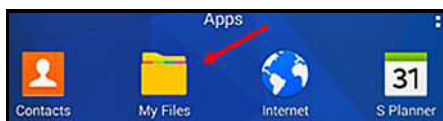

Plug the SD card directly into your tablet, and select the APK file from the SD folder.

Note: Check the Panametrics website for the latest version.

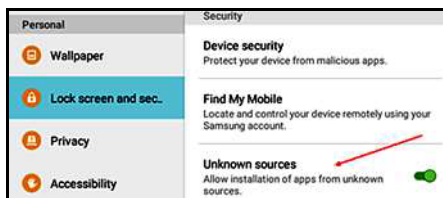

3. Installing the PT900 APP

If the PT900 APP was obtained from the SD card or from the QR Code/website, install the APP as follows:

- Open the "My Files" folder on the tablet screen and select the APP from the SD folder.

- Enable the *security option* to allow the installation of software from "Unknown sources" for this installation only.

- Click on the APK file, and you will see the screen below. Click "Install" to begin the installation.
