

HARNESS THE POWER OF AI

Introducing **InspectionWorks Analyze Light** – the cloud-based software platform that helps you find defects at the push of a button, so you can make better decisions, faster.

Waygate Technologies' first cloud ADR platform is an inferencing platform, meaning it uses Artificial Intelligence to process your data the same way, every time. Whether X-ray, CT, UT, or visual data, this AI-enabled Assisted Defect Recognition (ADR) tool helps inspectors find non-conformities in both manufacturing and services settings.

InspectionWorks Analyze from Waygate Technologies – ADR starts here. Inspection starts here.

Reduce up to **90%** of escapes

Quality

Reduce human factors and increase consistency. Say goodbye to fatigue, distractions, complacency and bias.

From **min** to **ms**

Speed

Deliver rapid decisioning in a fraction of the time.

Reduce resource constraints

Resources

Evaluate anywhere, anytime, and free up your trained experts for when it really matters.

Up to **50%** reduction in inspection cost

Cost

Drive cost avoidance through risk reduction and optimal use of resources.

Digital Transition

Build a digital triplet of your assets and allow the data to speak to you. Find defects, identify trends, and predict failures. See what's hiding in your data.

Inspection starts here.
